Introduction

The undergraduate programme BA English, aims for students to leverage their knowledge of the English Language for analyzing literature, history, and its modern aspects through the core subjects. In addition, the course explores the intricacies of the English Language and its implementation in diverse fields. Moreover, the subjects in a BA English course are composed by detail-oriented educators, providing a weighty syllabus related to diverse aspects of English literature and the language world.

The BA English subjects list's most significant and initial subject is the English Language. Initiating the three-year journey with the basics of English is necessary to further understand the in-depth concepts, complex language, and intricacies of world literature. The subject deals with a basic understanding of English grammar, with its origin, evolution, advancement, and further change with the modern world. The English language is also necessary to proceed toward complex study slowly. It also narrates the history of English, which can be very engaging and insightful for English learners. The subject allows learning the historical beginning and significance of English literature. Since the richness of English literature is heavily reliant on its history; therefore, this subject gathers the core English history modules covering the details of literature from different regions of the world. English literature also projects societal and cultural changes through the centuries that are reflected through its written works. As a student proceeds ahead, fields and specifications clear a lot better by possessing the knowledge and base of English literature, which is in its history.

A language's most significant trait is to communicate, and this BA course English subject is added to the syllabus with the same intention. Communication in BA English grants students the depth of using English as a communication medium. Fundamentals, theories, and communication tools are provided to the students to further enhance their English skills and make them more accomplishable. Communication subject also comprises the study of creative writing and public relations, helping students get enrolled in communication-based courses with the right foundation.

Under Graduate Programme

Programme Outcomes:

PO1: Disciplinary Knowledge: Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate programme of study.

PO2: Critical Thinking: Capability to apply analytic thought to a body of knowledge; analyse and evaluate evidence, arguments, claims, beliefs on the basis of empirical evidence; identify relevant assumptions or implications; formulate coherent arguments; critically evaluate practices, policies and theories by following scientific approach to knowledge development.

PO3: Problem Solving: Capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non-familiar problems, rather than replicate curriculum content knowledge; and apply one's learning to real life situations.

PO4: Analytical Reasoning: Ability to evaluate the reliability and relevance of evidence; identify logical flaws and holes in the arguments of others; analyze and synthesize data from a variety of sources; draw valid conclusions and support them with evidence and examples and addressing opposing viewpoints.

Highlights of the Revamped Curriculum:

- Student-centric, meeting the demands of industry & society, incorporating industrial components, hands-on training, skill enhancement modules, industrial project, project with viva-voce, exposure to entrepreneurial skills, training for competitive examinations, sustaining the quality of the core components and incorporating application oriented content wherever required.
- The Core subjects include latest developments in the education and scientific front, advanced programming packages allied with the discipline topics, practical training, devising mathematical models and algorithms for providing solutions to industry / real life situations. The curriculum also facilitates peer learning with advanced mathematical topics in the final semester, catering to the needs of stakeholders with research aptitude.
- The General Studies and Mathematics based problem solving skills are included as mandatory components in the 'Training for Competitive Examinations' course at the final semester, a first of its kind.
- The curriculum is designed so as to strengthen the Industry-Academia interface and provide more job opportunities for the students.
- The Industrial Statistics course is newly introduced in the fourth semester, to expose the students to real life problems and train the students on designing a mathematical model to provide solutions to the industrial problems.
- The Internship during the second year vacation will help the students gain valuable work experience, that connects classroom knowledge to real world experience and to narrow down and focus on the career path.
- Project with viva-voce component in the fifth semester enables the student, application of conceptual knowledge to practical situations. The state of art technologies in conducting a Explain in a scientific and systematic way and arriving at a precise solution is ensured. Such innovative provisions of the industrial training, project and internships will give students an edge over the counterparts in the job market.
- State-of Art techniques from the streams of multi-disciplinary, cross disciplinary and inter disciplinary nature are incorporated as Elective courses, covering conventional topics to the latest - Artificial Intelligence.
